

## Measured/requested representation semantics

| tool      | protocol             | retained basis                               | effective degree | affine flag | final Lt |
|-----------|----------------------|----------------------------------------------|------------------|-------------|----------|
| DiffReach | native first-order   | affine final; transient $\{t^2, t \cdot z\}$ | 2                | True        | False    |
| Flow*     | native first-order   | unsupported: API requires order $\geq 2$     | —                | False       | n/a      |
| Torch TM  | native first-order   | complete degree $\leq 1$ : $\{1, t, z\}$     | 1                | True        | False    |
| DiffReach | strict common affine | unsupported: no independent Lt remainder     | —                | True        | —        |
| Flow*     | strict common affine | unsupported: API requires order $\geq 2$     | —                | False       | n/a      |
| Torch TM  | strict common affine | complete degree $\leq 1$ : $\{1, t, z\}$     | 1                | True        | False    |
| DiffReach | supplemental         | restricted $\{1, z, t^2, t \cdot z\}$        | 2                | False       | True     |
| Flow*     | supplemental         | complete degree $\leq 2$                     | 2                | False       | n/a      |
| Torch TM  | supplemental         | degree $\leq 1$ with range-only restarts     | 1                | True        | False    |
