

Attitude Control: tube box projection

Axis-aligned box projection (not octagon).

No interpolation; missing projection steps are not inferred as solver failures.

new native Attitude, corrected unsafe: projection-unobserved 0/60, display-omitted 0, projection partial 0; record coverage only; acceptance unknown.

new native Attitude, corrected unsafe: adjacent run evidence UNBOUND to plotted series: status="completed".

new native Attitude, corrected unsafe: plot contract=explicit plotting declarations unbound to native records; step_size=matched to each binary record h/unavailable, expected_steps=explicit_cli_unverified/unavailable, lane_count=explicit_cli_unverified/unavailable.

The x4 projection of the unsafe box cannot by itself decide intersection with the full six-dimensional unsafe box; use the independent six-dimensional saved-box audit.
