

TORA: tube box projection

Axis-aligned box projection (not octagon).

No interpolation; missing projection steps are not inferred as solver failures.

2026 TORA remain Flowstar native: projection-unobserved 0/200, display-omitted 0, projection partial 0; displayed partial 0; record coverage only; acceptance unknown.

2026 TORA remain Flowstar native: adjacent run evidence UNBOUND to plotted series: status="completed".

2026 TORA remain Flowstar native: plot contract=explicit plotting declarations unbound to native records; step_size=matched to each binary record h/unavailable, expected_steps=explicit_cli_unverified/unavailable, lane_count=explicit_cli_unverified/unavailable.

Saved range records establish plotted intervals and record presence; they do not themselves establish solver acceptance or an independent NNCS certificate.
