

TORA reach-sigmoid · official 2026 model, $u = 11f$ · full initial box

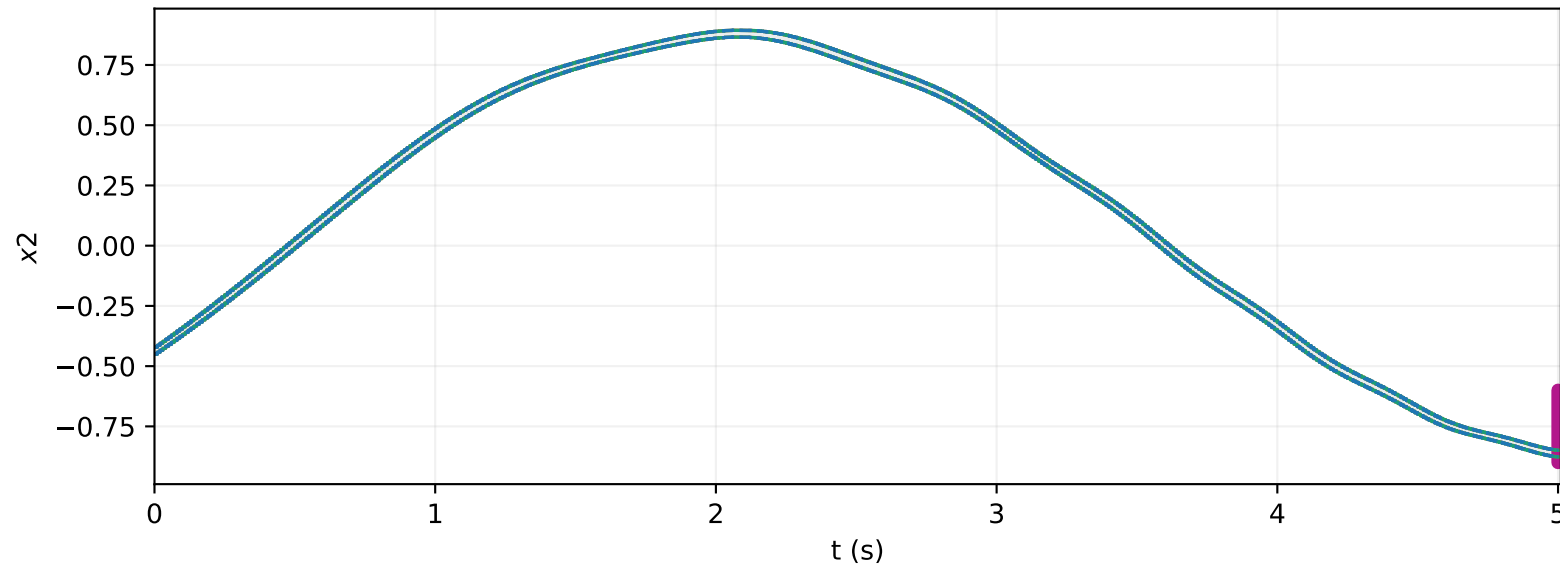

Saved whole-step x_1 tube (500×0.01 s)

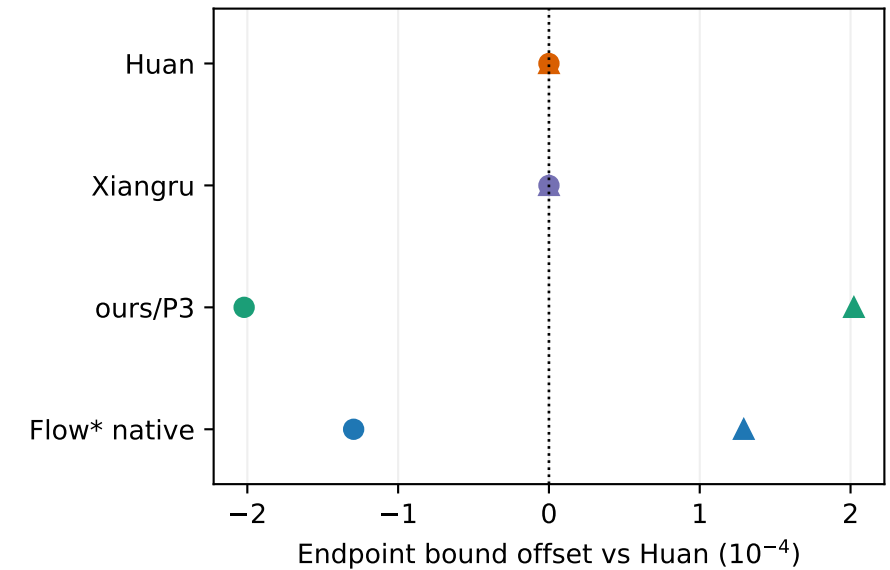

$T = 5$ x_1 : $\circ$ lower, $\triangle$ upper

Saved whole-step x_2 tube (500×0.01 s)

$T = 5$ x_2 : $\circ$ lower, $\triangle$ upper

Four full numeric $T=5$ histories; Huan and Xiangru saved tube bounds coincide. Magenta marks target only at $T=5$. All saved endpoints lie in target. Author Huan/Xiangru/P3 property checkers were not run; native author endpoint checker: VERIFIED. Axis-aligned saved boxes; adjacent outcomes are not content-bound. No independent end-to-end floating-point NNCS certificate.
