Max step: old 0.022973 | new 0.022914
Native 0.022803

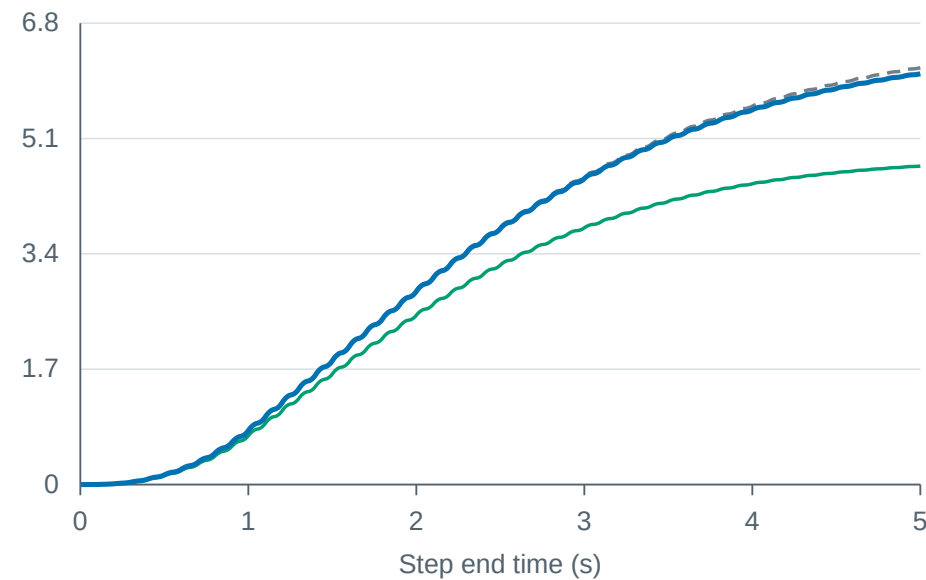

x8 | absolute width

Max step: old 0.022121 | new 0.022073
Native 0.02195

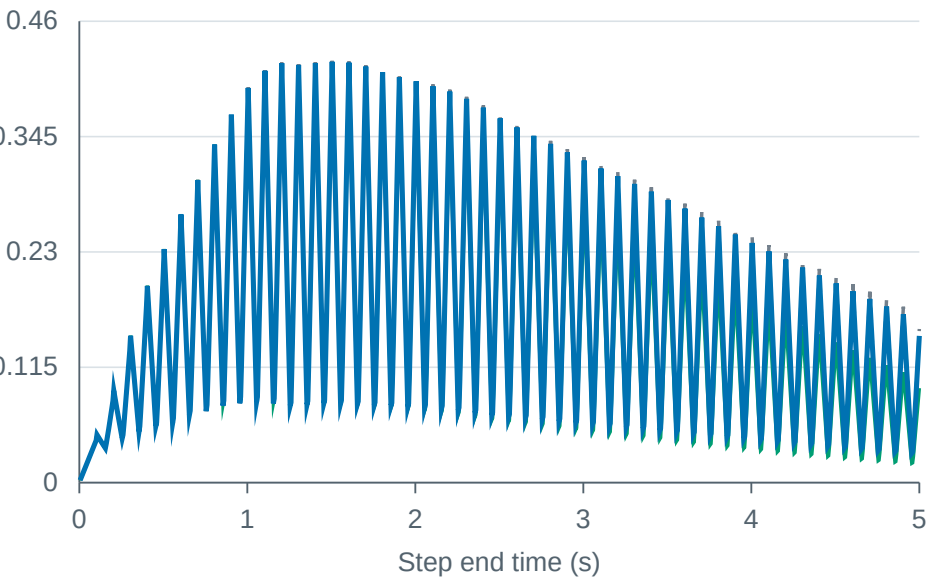

x9 | absolute width

scale 1e-3

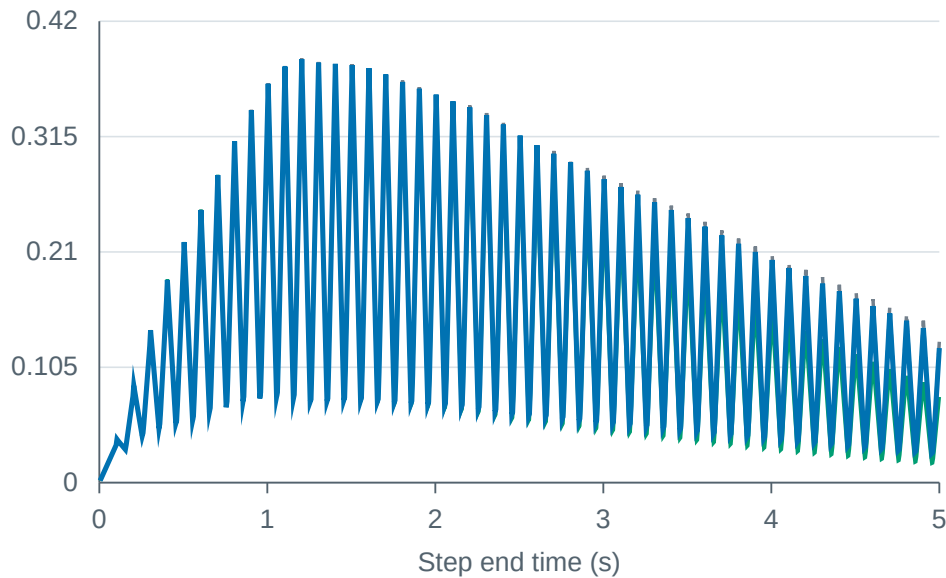

Max step: old 0.0061435 | new 0.0060551
Native 0.0046944

x10 | absolute width

Max step: old 0.42057 | new 0.41962
Native 0.41311

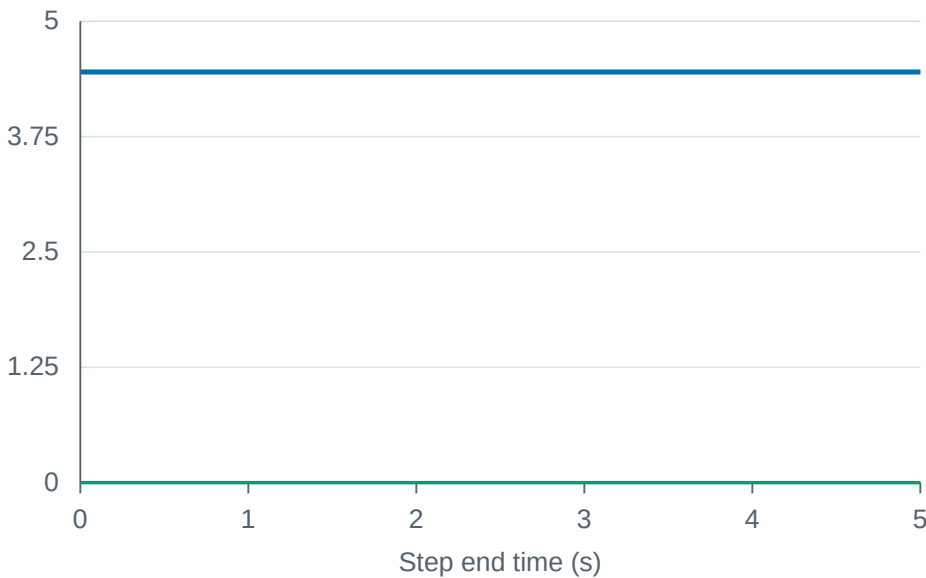

x11 | absolute width

Max step: old 0.38612 | new 0.38555
Native 0.38113

x12 | absolute width

scale 1e-308

Max step: old 4.4501e-308 | new 4.4501e-308
Native 0

Curves use saved pooled observers. Author markers use driver final hulls; these saved objects remain distinct.
Tube widths are per step, not all-time union widths. Narrower is not containment or an independent NNCS certificate.
