

QUAD: x1-x2 pooled coordinate-box projection

New P3: quad_paper_joint_full1000_001 (current selected run)

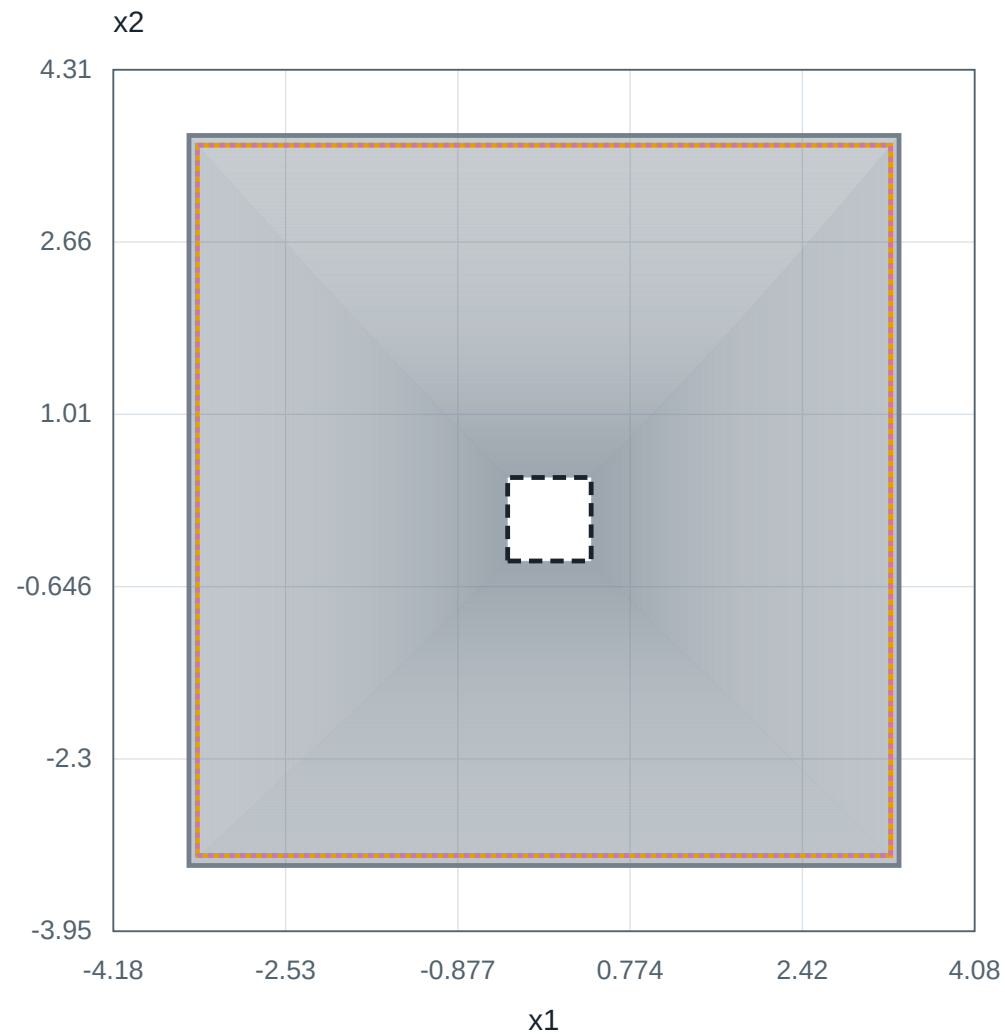

--- Old P3

— New P3

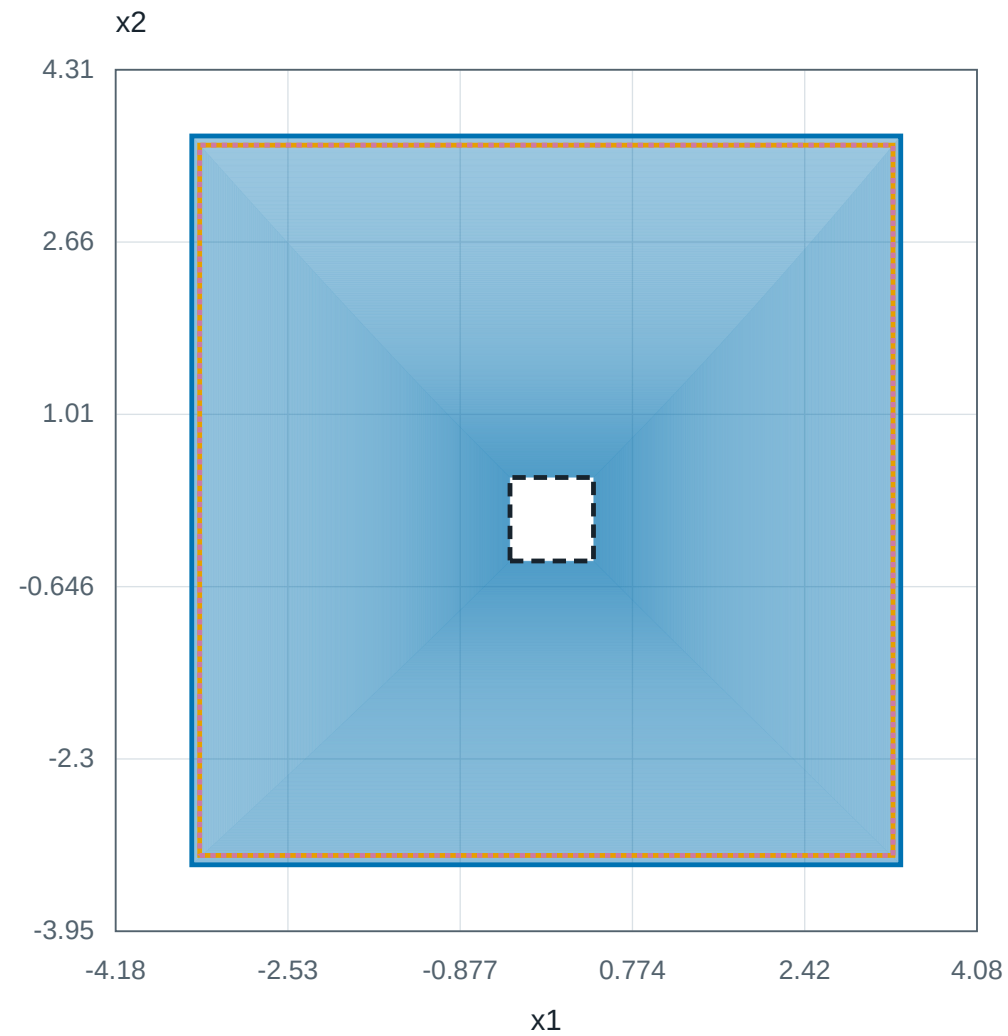

— Native

Black: initial set | Orange / pink: Huan / Xiangru terminal only

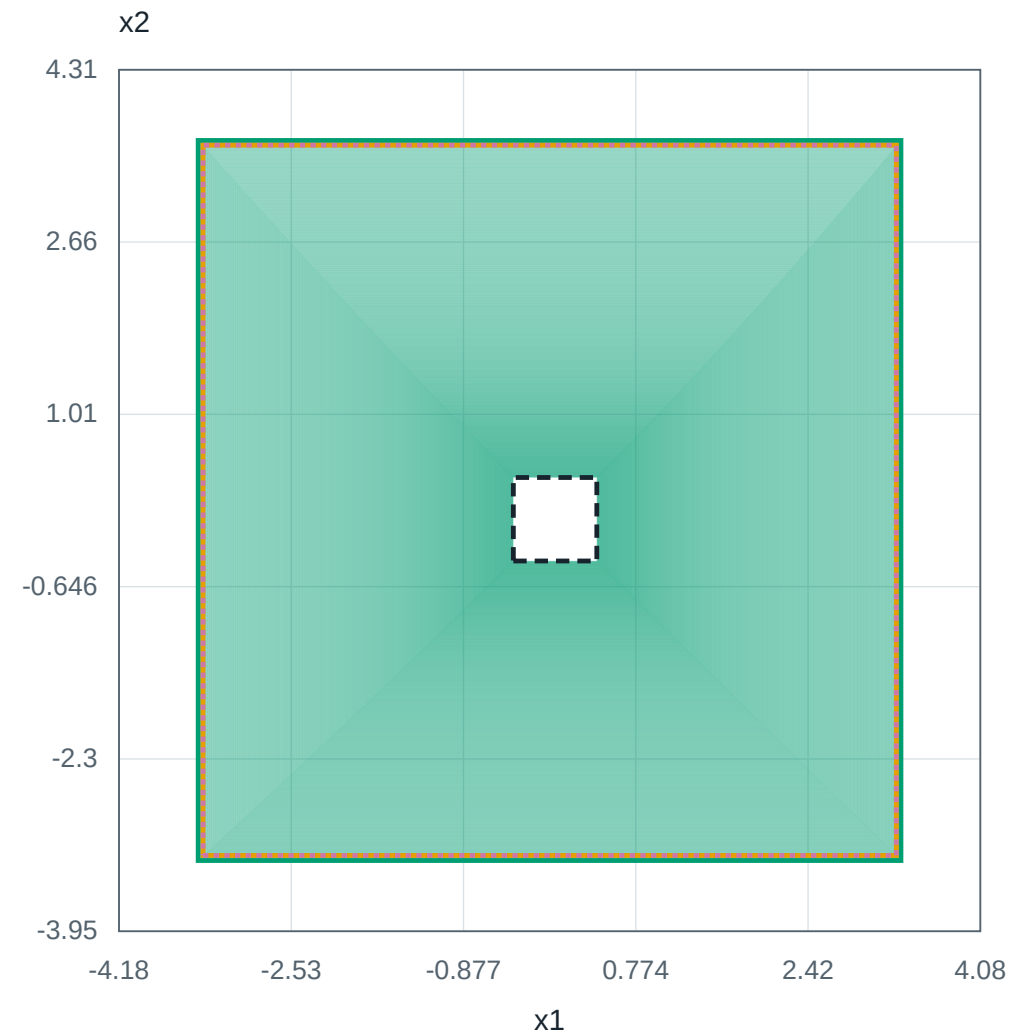

Old P3 | 1000 saved tubes

New P3 | 1000 saved tubes

Native | 1000 saved tubes

Each faint rectangle is [pooled x1 lower, upper] x [pooled x2 lower, upper] for one saved tube step.

Black dashed: initial box. Solid method outline: its final endpoint box. Orange/pink: author final boxes only.

All panels use the same coordinate scales. These axis-aligned boxes do not preserve per-lane or octagon correlation.

Saved numerical interval geometry only; no independent NNCS certificate or inferred continuous trajectory.
